Help Your Students Achieve Success in Math
By Providing SMARTHINKING’S Award-Winning Online Math Tutoring

ON-DEMAND ASSISTANCE
Our e-structor®-certified tutors provide one-to-one, online math tutoring when students need it—24 hours a day, 7 days a week. (Hours may vary seasonally.)

ACTIVE LEARNING
Using an online whiteboard for live, real-time collaboration, tutors guide students through solving math problems. Tutors do not solve the problems for students, but rather teach the underlying concepts.

INCREASED FACULTY SUPPORT
Our tutors act as your personal teaching assistants, helping students work through math assignments while reinforcing concepts taught in the classroom. Faculty can spend valuable class time focusing on new topics.

EXPERIENCED TUTORS
Our tutors have substantial teaching experience—most are current or former instructors. And over 85% of our math tutors have a masters or Ph.D. in math. SMARTHINKING’s e-structor®-certified tutor screening and selection process is rigorous. Once accepted, tutors are thoroughly trained and monitored, and receive ongoing professional development.

MATH TUTORING FOR ALL STUDENTS
• Basic Math
• Algebra
• Geometry
• Trigonometry
• Calculus
• Bilingual Math (English/Spanish)

"SMARTHINKING COMPLEMENTS OUR ON-THE-GROUND TUTORS by providing 24/7 online access, and an even greater range of subject matter support than we can provide face-to-face. And we know that SMARTHINKING tutors have a positive impact on student success. Our on-campus and online students value the convenience and quality associated with SMARTHINKING’s online tutoring services."

J. David Armstrong, Jr.
President, Broward Community College

SMARTHINKING® • 1900 L Street NW, Suite 301 • Washington, D.C. 20036

"What I like best about SMARTTHINKING is that my students can get help anytime...Students who spend time working with SMARTTHINKING do better on my tests than those who do not."

Dr. Jack Hughes
Instructor
St. Petersburg College
Florida

Here’s an example of a live, drop-in tutorial session in math.

Using SMARTTHINKING’s proprietary virtual whiteboard, our math tutor helps a student solve an algebra problem. Note how the tutor guides the student through the process of solving the equation.

SMARTTHINKING’s tutors, using a problem-solving based teaching style, help students learn underlying math concepts. Our tutors do not solve the problem for students. In this way, students learn to handle future assignments on their own.
